V. Methodology

The course will be organized in a way that provides the students with practical knowledge and hands-on experience which will prepare them to interact successfully with native and non-native speakers of English on a variety of environmental topics. It will include the following important components:

A. Public speaking: Talk Show, Debate, Persuasive Speech

There will be activities to analyze listeners in terms of how to be sensitive to their needs and interests, and how to talk to and with them. Students will be encouraged to communicate ideas to real people, rather than merely stand up and go through the motions of “giving a speech,” and apply practical activities to analyze the audience, select a topic and a specific purpose, devise a central idea, find verbal and visual support material, and design effective introductions and conclusions as well.

**B. ESP (English for specific purposes)**

During most of the class periods, students in small groups will have to deliver an oral presentation related to topics that have to do with the students' major. The students have to choose different sources related to the assigned topics. The sources have to be approved by the professor at least one week before the presentation. Moreover, they have to be sent to the rest of the class together with a summary of their main ideas and a list of the most relevant vocabulary words in the sources, with their corresponding definitions in English. The list must have a minimum of 10 well-chosen words. These presentations must be very dynamic and well-organized. Students are expected to incorporate the principles of public speaking in these demonstrations and prepare a short activity for the group. The day of the presentation, the rest of the class will bring questions to be used in a question-answer exchange. This will be a follow-up activity to grasp the content of each presentation and assimilate the main ideas. The evaluation sheet which will be used to assess these demonstrations will be discussed with the students.

C. Grammar and idioms

Students will have explanations from the teacher and useful practice about the use of different idioms, as well as of the following grammar topics: past tense, *would+base verb* and *used to* for past habits, gerunds and infinitives, reported speech, use of adverbs, and first conditional sentences.

D. Virtual Field trip

This virtual field trip will be the basis for the final class project, which will imply a careful and systematic preparation. The idea is to choose a touristic place in Costa Rica that offers a virtual visit to it, analyze it in detail, and prepare a detailed report of advantages, disadvantages, opportunities of improvement, and realistic proposals. Appropriate guidelines will be provided.

VI. Evaluation
